

Is your company protected against data loss ?

The odds are stacked against any business that doesn't protect their data...

- 34% of companies fail to test their tape backups, and of those that do, 77% have found tape back-up failures.
- 60% of companies that lose their data will shut down within 6 months of the disaster.
- Companies that aren't able to resume operations within ten days (of a disaster hit) are not likely to survive. (Strategic Research Institute)
- 31% of PC users have lost all of their files due to events beyond their control.
- 30% of all businesses that have a major fire go out of business within a year. 70% fail within five years. (Home Office Computing Magazine)
- 6% of all PCs will suffer an episode of data loss in any given year. Given the number of PCs used in US businesses in 1998, that translates to approximately 4.6 million data loss episodes. At a conservative estimate, data loss cost US businesses \$11.8 billion in 1998. (The Cost Of Lost Data, David M. Smith)

Top Five Reasons to Use Datavault

1. Protect all notebooks, desktops and servers
2. Protect business data against virus attack, hard disk failure as well as fire and flood.
3. Secure and reliable. Total peace of mind.
4. Fully automatic. Easy-to-use.
5. Save you time and money

Protect Your Data From

Natural Disasters
Acts of Terrorism
Computer Viruses
Sabotage
Human Error

Daily Backup of Your General Data Files

Users My Documents Folder
Email, Contacts, Calendar
Microsoft SQL Server 7.0
Microsoft Exchange 2000/2003
Oracle 8i/9i
Lotus Dominos Notes 5.0 & Above

Runs on Many Operating Systems

Windows 95, 98, ME, NT, 2000, 2003, XP
MAX OS X
Linux/Unix/BSD/Solaris
Novell
Any platform supporting Java2

Benefits

Fully automated
No administration required
Send data off site to secure data center
Reduces work load
Eliminate negligence
Easy to deploy and maintain
Saves money and time
Run your backup automatically at night
Receive morning backup report via email
Access your data anywhere, anytime
Easy-to-use web interface

Security

Point to Point SSL between server and client
Data is 128-bit encrypted and compressed when stored
ONLY the user has decryption key, no one else
Twofish, Triples DES, or AES encryption
Restricted access by IP address
Data access audit logs
Not even WE can see your data.
Twofish encryption would take 100 trillion years to guess all possible keys

Compliance

HIPPA—Yes!
Sarbanes Oxley—Yes!
SEC/NASD—Yes!
